## AT SUPREME COURT

### KING MURDER TRIAL BEGUN

Evidence produced to show that prisoner and Hayward went north together.

Half an hour before the time fixed for resuming the hearing in the case of Rex versus King at Supreme court yesterday a crowd began to gather around the entrance to the stairway leading to the court room and when court opened at 2 o'clock every seat outside the bar was occupied and many were standing in the halls and stairway.

The jury consists of Messrs. Rice, Sheppard, Foreman, A. W. Toll, F. E. Cuthbert, J. Mellish, W. Dietz, and J. Caruthers.

The evidence during the afternoon was for the purpose of showing that the prisoner had been associated in the city some time during August with another stranger whom the crown claims was Hayward and that the two had left the city together with the intention of going to the Peace River country to trap or prospect or both, and to trace the progress of the men from the time they left the city.

An Outfit purchased by two men.

J. C. Dowsett, secretary treasurer of Ross Bros. Limited was the first witness called. He recollected two men having cashed a cheque in the office of the company about the time in question. He thought the cheque was signed by Hayward and drawn on the Canadian Bank of Commerce, Nelson, B.C. where the men told him they had money on deposit. The cheque had been cashed, part being taken in payment of goods purchased. The pass book of the bank had been left with him. He recognized the stamp of the company on the back of a cheque produced. Saw the men again between the city and Stony Plain on Sunday afternoon and saw the outfit again on Tuesday between Riviere Qui Barre and Bay. Thought that on the latter occasion there was only one man.

Jas. Harper of Ross Bros. remembered two men having fitted out during the month of August for the north. They had bought a gold pan among other things but witness could

not identify the pan produced. He recognized the prisoner as one of the men and identified the photograph of Hayward as that of the other. Witness last saw the two men between St. Albert and Tay headed north.

### Pack Horses Purchased.

Henry Fraser fur buyer for McDougall & Secord was called and testified to having sold two men four pack ponies during August. He recognized the prisoner as one of the men and the photograph of Hayward as that of the man who conducted the negotiations and paid for the horses. He identified the horses produced by the crown as those he had sold the men. The men had talked of several Northern points but had not told him definitely where they were going. No bill of sale had been given with the horses.

John A. McLean of the staff of McDougall and Secord testified to having seen the prisoner and another man whom he recognized as Hayward from the picture, in the store. The missing man had a nugget pin. They had bought some horses from Fraser. Last saw the men going down the street with the horses.

## WANTED.

GOOD AGENTS FOR THE Oliver Typewriter IN ALL

### UNOCCUPIED TERRITORY

Over 100,000 of these machines have been sold in the U.S. within the last few years at the same price which is being charged for any other standard typewriter. This proves conclusively that the OLIVER is the very best machine made regardless of price.

As there is now in Montreal a factory devoted exclusively to the manufacture of this machine, it can be bought in Canada for the same price at which it is sold in the U.S. without adding from \$25 to \$30 to cover duty and charges, as do all the other standard writers.

This should be a very attractive proposition to any purchaser of writing machines.

### PARLIAMENT

Ottawa, February 22nd, 1905.

#### Autonomy

Autonomy for the territories, which has been talked of for so long from so many different points of view and with regard to so many interests, became a live political issue yesterday, when the Premier introduced bills providing for the division of the North West Territories and the establishment of the two provinces of Alberta and Saskatchewan. The occasion was recognized as one of first importance in the progress of the Canadian nation by a full house and crowded galleries; and the Premier in his speech certainly rose to the occasion.

#### The Premiering of Form

In comprehensive grasp of his subject setting forward strongly its main features, but covering every important point of history and of detail; argumentative where argument was required; eloquent where eloquence was appropriate; lucid, logical and forceful at all times; his address showed not only his master mind but the spirit of mastery, the desire for and power of control in the building of the nation. As there were no wasted words or repetitions, it would be impossible to give a condensation of the speech, but would be fairer to the speaker or the subjects. All that can be done effectually is to reproduce the facts stated.

Premier Haultain and Hon. Mr. Bouchey, of the Territories Government, and Hon. Robert Rogers, of the Manitoba Government, were admitted to the floor of the House.

#### A Step Forward Not a Change of Condition

In the beginning of his remarks the Premier alluded to the rights of self-government already accorded the Territories, and pointed out the slight differences yet remaining between the status of the Territories and that of the provinces. The transition from territorial to provincial status was not a long step, but it was an important one and marked a period in the history of Canada. The Government had not acceded to the first demands for provincial organization because they had not believed the time ripe; but with continued increase of population and the assurance of still further increase they had decided that the step which must be taken sooner or later might with advantage be taken now.

#### Reason for two Provinces

The decision to create two provinces rather than one, was reached because of the overshadowing area that a single province would have had. Each of the two proposed new provinces would be amongst the largest in area in the Dominion and would immeasurably exceed any of the others in agricultural possibilities. While he did not lay great stress upon the question of area, he still thought it was a matter worthy of consideration.

#### Manitoba's Aspirations

Manitoba had asked for extension of boundaries several times. This request had first been made many years ago and afterwards repeated several times. If there were reasons for its not being granted when first made these reasons were necessarily much emphasized after the Territories had become largely populated and had been under a different local government for so many years.

#### Extension to the Bay

Both Manitoba and Saskatchewan asked for an extension to Hudson's Bay, Ontario and Quebec were also backed by a vast region which projected on the Bay. The Government would be prepared to make into consideration at an early date the desirability of extending our province to the Bay, but did not think it advisable to take the question up in connection with the organization of the two new provinces alone.

#### Boundaries

Three provinces would extend from the international boundary to the 66th

parallel; they would be divided by the 100th principal or 110th meridian. The western, Alberta, would extend to the Rocky Mountains, and the eastern, Saskatchewan, on the line which formed the western boundary of Manitoba. The territory north of the 55th parallel, now called the Northwest Territories, would be divided into two federal jurisdictions. The boundaries would give each province about 270,000 sq. miles, or practically the area of Ontario.

#### Equality of the New Provinces

The population was estimated at 250,000 in each province, and all arrangements, legislative and financial were on exactly the same footing. Each province would be given a legislature of twenty-five members; the capital of the eastern province would be at Regina, and of the Western at Edmonton. Of course the ultimate right of each province to fix the final location of its capital was not interfered with.

#### The Four important Points

He considered that in the question of autonomy four subjects dominated all others; first, how many provinces should be admitted; second, the ownership of the public lands; third, what should be the financial terms; and fourth, what school system should be introduced or continued.

#### Federal Control of Lands

Regarding control of the lands, the Government had decided that to be able to give effect to their immigration policy, which had produced such satisfactory and valuable results during the past few years, it was necessary that they should retain control of the public lands. In this they had the precedent of their predecessors in dealing with the province of Manitoba, and of the Government of the United States in dealing with the lands of the new territories and states. While they considered it sound public policy for the federal authority to retain control of the lands, they recognized that as other provinces were able to derive revenue from their public lands, it was necessary that a corresponding or compensating allowance should be made the government of the new provinces on this account. They had adhered strictly to the terms recorded of the other provinces by the Act of "Cooperation" so far as those terms met the conditions of the new provinces, but in regard to compensation for lands they had taken a new basis which they believed would be accepted as fair and reasonable by the people of those provinces and would not disturb the present policy of administering the lands for development rather than for revenue, which was also accepted as satisfactory by the people of the West.

#### The Financial Terms

The great difference between the terms accorded the other provinces, and those accorded Alberta and Saskatchewan was, that in the case of the other provinces the amounts paid were based on a fixed population; in the case of Alberta and Saskatchewan, while a fixed amount is paid, an increase is provided for, based upon

BULLETIN CO. Ltd.

Our city has good water but good water can be made better, and Ross Bros. Ltd. have the thing to do it with. Have you seen their "Noxall Filter." It is the simplest Filter on the market, the most thorough and by a long ways the cheapest. Any family can afford one and they are made either for pressure to attach to your city water tap or gravity to filter from a pail or crock.

**You Wouldn't Eat Dirt**

**WHY drink it? Guard against disease and poison from impure water by using a**

**NOXALL**

**Germ Proof Water Filter**

Positively removes all germs and impurities. It is quick-flowing, simple, compact, cleans in a minute and does not require frequent renewal.

**CALL AT THE STORE FOR DEMONSTRATION**

**Ross Brothers, Ltd.**

Following is one of the many testimonials that speak of the work done by these Filters:—

**The Duquesne Chemical Laboratory.**  
Analytical Chemists and Chemical Engineers, Standard Bldg., 531 Wood St. Pittsburg, Pa., April 12, 1897.

GENTLEMEN:—Following is the report on the samples of water taken from the regular city supply, and also after it had passed through the Tripoli filter. Two filters were tested in this manner one having just been started and the other having been in use four months. The chemical analysis, made to show animal and vegetable pollution, includes the amount of ammonia, albuminoid ammonia and oxygen required to completely destroy such pollution. The bacteriological analysis is a count of the total number of living microbes in ten ordinary drops of water. This test was repeated in duplicate in case of the filtered samples. The results obtained on analysis as follows:

Water from hydrant.	From old filter.	From new filter.
Ammonia . . . . .	0.03 . . . . .	0.02 . . . . .
Albuminoid Ammonia . . . . .	0.20 . . . . .	0.09 . . . . .
Oxygen Consumed . . . . .	1.64 . . . . .	0.56 . . . . .

The figures represent parts of the impurities in one million parts of water. On cultivation, the hydrant water showed 890 bacteria in ten drops. That from the old filter 40, 2 and 4 in three tests, and from the new filter 3, 3 and 7. The above shows that the number of living microbes present has been reduced 99.6 per cent.; the ammonia is reduced 39 per cent.; the albuminoid ammonia 57 per cent., and the oxygen consumed 64 per cent. by passing through the filter, making the originally very bad water equal in cleanliness and purity to the best spring water. These results cannot be surpassed by any system of filtration with which we are familiar.

Respectfully submitted,

W. R. GARRIGUES CHIEF CHEMIST AND MANAGER.  
99.6 per cent. of living microbes eliminated by use of the filter.

The price is from \$3.00 up, the \$3.00 one fits on to any house tap and can be removed in two seconds. They are stone Filters and the stones can be cleaned as easily as any glass tumbler or delf cup. The Gravity filters are only \$4.50 and readily filter water from a pail into any other vessel placed to receive the filtered water. They are small and can be easily packed in a very small space to carry from place to place.

The above is correct cut of the Tap Filter, showing it in operation.

The above is correct cut of the Gravity Filter, showing it in operation.

These Filters can only be had in Alberta from ROSS BROS., who are Sole Agents. The Trade supplied.

**ROSS BROTHERS, Limited.**

## PARLIAMENT

Continued from page 2.

on increase of population. The figures are as follows: On a basis of 250,000 estimated population each, fixed annual grant for population:

1880-81 ..... \$50,000  
82c. per head per year ..... 200,000  
Interest on debt account ..... 405,375  
Interest on lands ..... 375,170  
Total present yearly grant ..... \$1,050,545

There is besides an allowance of \$62,500 per year for five years; a total of \$312,500; out of which it is expected provision will be made for the erection of the necessary provincial buildings.

The legislative grant and debt account are fixed amounts. The 82c. per head increases every two and a half years according to population up to a total of \$90,000 in each province.

The lands account is computed on an estimate of 25,000,000 acres of land for each province valued at \$1.50 an acre, a total of \$37,500,000. On this interest is allowed at 1 per cent. until the population reaches 800,000; from 800,000 to 1,200,000, two per cent. interest is paid; and above 1,200,000 three per cent. interest is paid.

This calculation works out as follows on a population of 1,200,000: \$37,500,000 x 3% = \$1,125,000; \$1,125,000 x 2/3 = \$750,000; \$750,000 x 1/3 = \$250,000; total \$1,000,000; and account \$1,050,545, total \$2,050,545.

The increase in payment on lands account is based on the supposition that as population increases the value of the lands will correspondingly increase and the new province will get the benefit.

C. P. R. Exemption Holds

On the subject of C. P. R. exemption from taxation, the premier said that the exemption granted in 1880 would have to be continued; that is to say, an exemption forever on the road bed and rolling stock and on the lands for twenty years after their being patented, unless in the case new before the courts a contrary decision were reached.

## The School Question

On the school question the Premier dealt fully with the history of the question in the old provinces of Canada and in the North West. As a result of the difficulties which prevailed for so long between the old provinces of C. P. R. and C. O. a provision was made in the Act of Confederation that separate schools should be guaranteed to the religious minority of Quebec and Ontario, and that on the introduction of any new province into the Dominion the system of schools therein prevailing should be continued in the case of Manitoba, when the question came up it was judiciously decided that there was no school system previous to confederation and therefore Manitoba was as free to deal with her schools as were Nova Scotia and New Brunswick. But when the North West Territories were being organized in 1875 a provision for separate schools was inserted at the request of Mr. Blake. The school system then provided for existed in the North West Territories until the present time, therefore, under the terms of the British North American Act; the minority of the people of Territories were entitled to the same protection as the people of the minorities of Quebec and Ontario on the admission of those provinces into confederation. He did not discuss the merits of the separate school question itself, but he declared his belief in religious insuperability in the schools and drew a comparison between the social conditions in Canada and in the United States as evidence in favor of religious teaching as given in Canada as compared with the schools of the United States where religious instruction is not permitted.

Mr. Gordon Replies

Mr. Gordon replied, commenting first on what he called the Premier's change of heart in regard to the question of territorial autonomy, and afterwards on the absence of the Minister of Interior. While very guarded in his remarks, he seemed inclined to take issue with the Premier in regard to the control of lands. In regard to the school question he was still more guarded and deprecated the possibility of its being made a matter of politics. He concluded by making for a large amount of information which would bear chiefly upon the arrangement of the local constituencies and the location of the capitals. He said, and said truly, that it was impossible for him to discuss at length the provisions of a bill which he had not yet seen; he would therefore defer his further remarks until the second reading of the bill. It is expected that the second reading will take place the first week in March.

D. Sproule Good-Natured.

Dr. Sproule, who had interrupted the Premier once or twice during his remarks on the school question, made a good-natured reference to the introduction of such a healthy pair of twins into the family of provinces and suggested that the second reading of the bill should be deferred for three weeks or a month. It is not likely, however, that so long a delay will be allowed.

Absent Minister.

A remarkable fact in connection with this bill, and showing the position which the Premier holds in his cabinet, is that the bill was drafted and placed before the House in the absence of both the Minister of Interior and the Minister of Finance, each of whom might be supposed to be equally and deeply interested in its provisions and their presence equally necessary to its acceptance by the Government and its presentation to the country. However, both will be present for the debate on the second reading.

## THE GUM REMOVED

THE microscope shows each leaf of tobacco is covered with long soft hairs which exude a viscid juice.

This is called the gum, and it covers the surface with a moist glutinous exudation.

Tobacco, to be good, must have all this gum driven out.

In Manicagua I procure tobacco that has all this gum "sweated" by the natural heat of the climate.

Only the dry, well matured leaf remains—the leaf that when I age for three years will give a cool, fragrant smoke—odorless and aromatic—that's the characteristic odor of my Pharaoh.

## WHY HE RESIGNED

Mr. Sifton Reads Statement

Could not agree with arguments or Provisions of the Bill, Bill may be Modified.

Bulletin Special.

Ottawa, Aug. 1.—The Premier announced the resignation of the Minister of the Interior this afternoon, solely on account of a difference of view on the school clause of the autonomy bills. He expressed great regret. The resignation was sent on Monday and accepted Tuesday. Mr. Sifton read a short statement. He had not expected that the bill would be introduced before his return and had not been consulted regarding the school clause. He could not agree with the Premier's arguments on that subject in presenting the bill and on reading the provisions of the bill on Monday had decided that he must resign. He had asked that his resignation take effect at once and expressed the hope that the cordial feeling existing would continue.

Leitch, McCarthy, Liberal, announced that he would oppose the separate schools provision of the bill. Guthrie, Liberal, followed, and accepted the provisions fully.

Mr. Foster, acting leader of the Opposition in Mr. Sifton's absence, said Mr. Sifton's resignation had been expected on the record of the Minister. He hinted that the Minister of Finance was dissatisfied also.

Sproule, Hughes and Taylor, Conservatives, congratulated Mr. Sifton and Mr. McCarthy.

The Premier disclaimed Mr. Foster's insinuation of treachery against Mr. Sifton. It is exposed that the resignation of Mr. Sifton will lead to some modification of the provisions of the bill, and he will then support it.

Mr. Mackenzie Bowell made his expected statement in the Senate regarding his being forced out of the Premiership in 1895 and reiterated his celebrated allusion to the "Nest of Traitors."

The supreme court upsets the Manitoba decision in the P. R. Sifton case. The case will be appealed to the privy council.

What Mr. Sifton Thinks

Bulletin Special.

Montreal, March 2nd.—The news of the resignation of Mr. Sifton has caused a sensation in certain political circles, the feeling is that Sifton's withdrawal will place the Government in an awkward position and render it extremely difficult for it to carry through its separate school policy. Mr. Sifton, ex-M.P. for Lisgar who is in Montreal, said "I have never seen him for some time. Mr. Sifton has been considering the advisability of retiring from public life, which offers little attraction to him at present. His resignation on a question like this will certainly be most popular in the west. I may say that outside of the minority time-servers and the people he represents are opposed to separate schools and Mr. Sifton has acted in a way to strengthen himself merely among them should he at any future time desire to re-enter politics. Mr. Richardson also expressed the opinion that Walter Scott was the most likely man to succeed Mr. Sifton. "As to Sifton," added Richardson, "I cannot see how he could do otherwise. He has always been regarded as the champion of separate schools. After his action in Manitoba I feel that he would be most likely to see how he could impose on the North West which he represented as a Minister, a system which is regarded as even more iniquitous than that which was abolished in Manitoba. His action will be approved by all parties in the west and he goes out with an accession of strength."

## ENGINEERS EXAMINATIONS.

Following is a list of engineers who wrote on the examination for final certificates at Edmonton yesterday:

Wm. E. Walters

## AT SUPREME COURT.

Continued from page 1.

Jas. York remembered seeing Fraser sell four horses to two men one of whom was the prisoner. He identified Hayward as the other.

## Other Purchases Made

R. Kenneth remembered having sold a sewing palm during the fall or summer but could not recognize the one produced in court. Also sold some needles at the same time. Could not say the palm produced was the one he had sold.

J. E. Clark, harness maker, had seen the prisoner in his shop during the month of August with another man. He identified the photograph as that of the second man, who had purchased an outfit of pack saddles. Witness examined four pack saddles produced in court and said he believed they were made in his shop.

Ira Fetterly said he worked for Mr. Clark. Remembered selling four pack saddles to two men in the month of August last. He recognized the prisoner and the photograph of Hayward as the parties.

## Saw them at the Pembina.

Chas. Collier who lives at the Pembina river said he had seen the prisoner before in the company of another man whom he recognized in photograph of Hayward. In conversation they had told him they were going to Peace River. The man had told him he was an Englishman and had been pretty well around the world and that his name was Ted. The prisoner said his name was Charley. The outfit had included a beartrap, gold pan, oven, dog 4 horses. Witness identified the dog and one of the horses in the custody of the police.

## At the Pembina

Benjamin, a Stony Indian from Alexander's reserve, was sworn and said that during August he went from Lac La Nonne to the Athabasca at old Fort Assiniboine to hunt moose. At the Fort he saw two white men, the prisoner was one and recognized as one and the picture of Hayward as that of the other. Hayward had asked in English what win was about charge to ferry them and their outfit across the river. Witness had answered three dollars for which sum he took them across the river. He had made an entry in his book of the time as the men had said they would be back there in fifty days. He named many of the articles in the outfit of the two men and identified a broken gun and the dog in court as those he had seen in their possession. Witness had got a watch from the missing man which he had afterwards given away. He identified a watch produced by certain marks which he had made on the face. He identified two of the horses.

Mary Hamelin, aunt of Benjamin corroborated his story about taking the two men across the river. She identified the prisoner and the dog.

The court then adjourned until 10 A.M. to-day.

## This Morning's Evidence.

The morning's evidence continued with the Indian, Benjamin, who was sworn and said that during August he went from Lac La Nonne to the Athabasca at old Fort Assiniboine to hunt moose. At the Fort he saw two white men, the prisoner was one and recognized as one and the picture of Hayward as that of the other. Hayward had asked in English what win was about charge to ferry them and their outfit across the river. Witness had answered three dollars for which sum he took them across the river. He had made an entry in his book of the time as the men had said they would be back there in fifty days. He named many of the articles in the outfit of the two men and identified a broken gun and the dog in court as those he had seen in their possession. Witness had got a watch from the missing man which he had afterwards given away. He identified a watch produced by certain marks which he had made on the face. He identified two of the horses.

## Superfluous Hair

Removed by the New Principle

## De Miracle

It is better than electricity, because  
it does not scar or produce a new growth.  
Better than X-ray, because it does not  
burn, scar or paralyze the tissues under  
the skin. Better than depilatories, be-  
cause it is not poisonous; therefore,  
it will not cause blood poisoning, or  
produce eczema, which is so common  
with depilatories, and does not break  
off the hair, thereby increasing its  
growth.

Electrolysis, X-ray or depilatories are  
offered you on the bare word of the  
operators and manufacturers. DE  
MIRACLE is not. It is the only method  
which is endorsed by physicians, sur-  
geons, dermatologists, medical journals  
and prominent magazines.

DE MIRACLE will be mailed to any  
address, sealed in plain wrapper for \$1.  
Your money back without question if it  
fails to do all that is claimed for it.

Our booklet—the most complete  
treatise on Superfluous Hair ever pub-  
lished—containing the testimonials of  
numerous physicians and surgeons and  
those of hundreds of others—will be  
sent free, in plain, sealed envelope,  
upon request. Write for it to-day to  
DE MIRACLE CHEMICAL CO., 23  
QUEEN STREET WEST, TORONTO, ONT.

THE  
ROBERT SIMPSON COMPANY LIMITED  
TORONTO, ONT.

about how it was quite a distance  
from the main traveled trail. "back  
among the brush on a little trail  
only used by Chief Mestibos occa-  
sionally in getting out wood. In the  
cross-examination the witness held to  
the same story as told in the prelimi-  
nary and also above with a couple of  
minor exceptions as to just what  
words were used in talking with the  
man at the camp. He saying at the  
former hearing that he talked in Cree  
and now that he spoke some in Eng-  
lish.

## THE POLICE INVESTIGATION.

Sgt. Anderson, of the North  
West Mounted Police, was the next  
witness to take the stand. His story  
briefly was as follows. "The Indians  
came and told me some strange  
things which caused me to go down  
with the chief Mestibos to a deserted  
camp fire. At the time I was the  
officer in command of the Lesser  
Slave Lake post of the N. W. M. P.  
We took Mestibos with us, and when  
we came to the camp site, I started  
digging in the ashes of the extin-  
guished camp fire. The ashes were  
about a foot deep below the level  
of the ground.

## BLOODY FLESH FOUND.

I first found some small, burned  
bones in the ashes and after digging  
some while longer both with the  
spade and with my hands. Searching  
in this manner I came across a lump  
of badly burned flesh about six inches  
long and round, also a piece of what  
I took to be a liver. Under some  
straw near the ashes of the camp  
fire, I found some matter that seem-  
ed to be blood and rain. Afterwards  
I found in the ashes a piece of flesh  
that looked like liver. I counted the  
stumps about the camp where  
trees had been used by the former  
inhabitants. I later found a kettle  
in the slough near the camp.

## EDMONTON ATTACKED.

From the attitude previously assumed by the press of that city, it was not to be supposed that the announcement that Edmonton had been selected as the temporary capital of the province of Alberta would be received by the Calgary papers with satisfaction nor with equanimity few passions are more desperate or voracious than baffled greed and to expect that the organs which had devoted themselves solely to the business of preventing Edmonton being made the temporary capital would accept defeat either in silence or good nature and settle themselves to reasonable and legitimate effort to win out in the final for the permanent location was to expect the hopeless.

But while the right or duty of the Calgary press to advance the claims of that city have not been questioned it might have been expected that the contest would be conducted with some regard for those laws of fairness and truthfulness which are the admitted bounds to all reasonable discussion. If such expectations existed they have been speedily dissipated by the course pursued.

The Bulletin has no desire nor intention to emulate the mudslinging propensities of the contemporaries in question but neither has it any intention of permitting a campaign of misrepresentation and falsehood to be waged against this city with impunity. Such campaign has been begun by the Calgary press and pursued to the present with a vigour and persistence worthy a better cause. The effort has not been to prove the suitable location of Calgary but to attack the location, present and prospective, of Edmonton. Realizing the danger of an appeal to fact or argument the ordinary weapons of controversy have been discarded for the bludgeon of falsehood. No statement has appeared too misleading and no forecast too reckless to be found in this savage warfare. A false claim of the editorial perversion to which these journals have been driven for ammunition with which not to defend Calgary but to attack Edmonton, occurred in the Herald on Friday. In the course of a long article of the same quality appears these paragraphs:

"From every direction members of the legislature must travel all the way across the new province to reach the provisional capital, and in many instances these members must pass through Calgary."

It is evident from the map that not one of the representatives to the first legislature will travel more than half way across the new province and that if a fair distribution of seats be made not more than one quarter or at most one third of the delegates will see Calgary en route.

As the centre of a circle of one hundred miles radius, we find that

Continued on page 7.

Synopsis of regulations for Disposal of Minerals on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory

**Coal.**—Coal lands may be purchased at \$10 per acre for soft coal, and \$20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of 10 cents per ton of 2000 pounds shall be collected on the gross output.

**Quartz.**—Persons of eighteen years and over and joint stock companies holding free miners' certificates may obtain entry for mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of \$7.50 per annum for an individual, and from \$50 to \$100 per annum for a company, according to capital.

A free miner, having discovered minerals in place, may locate a claim 1500 by 1500 feet by marking out the same with two legal posts bearing location notices, one at each end of the line of the lode or vein.

The claim may be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is \$5.00.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$1.00 per acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper, in the Yukon Territory, of an area not exceeding 160 acres. The patent for a mining location shall provide for the payment of royalty on the sales not exceeding five per cent.

Placer Mining, Manitoba and the N. W. T., excepting the Yukon

Territory.—Placer mining claims are generally 100 feet square, entry fee \$5.00, renewable yearly. On the North Saskatchewan river claims for either bar or bench, the former being 100 feet long, and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the river below low water mark, 1000 feet. Where steam power is used, claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N. W. T., excepting the Yukon Territory.—A free miner may obtain only two leases of five miles each, for a term of twenty years, renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged bed or bars of the river below low water mark, and subject to the rights of all persons who have or who may receive entries for bar diggings on bench claims, except in the Saskatchewan river, where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease, one dredge for each fifteen miles, or fraction, will be sufficient. Rental, \$10 per annum for each mile of the river leased. Royalty at the rate of two and a half per cent, collected on the output after it exceeds \$10,000.

Dredging in the Yukon Territory.—Six leases of five miles each may be granted to a free miner for a term of twenty years, also renewable.

The lessee's right is confined to the submerged bed or bars in the river below low water mark, that boundary to be fixed by its position on the first day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles within six years from such date. Rental, \$100 per mile for first year, and \$10 per mile for each subsequent year. Royalty same as placer mining.

**Placer Mining in the Yukon Territory.**—Creek, gulch, river, and hill claims shall not exceed 250 feet in length measured on the base line or general direction of the creek or gulch the width being from 1,000 to 2,000 feet. All other placer claims shall be 200 feet square.

Claims are marked by two legal posts, one at each end, bearing positions. Entry must be obtained within ten days. If the claim is within ten miles of a mining recorder's office, one extra day allowed for each additional ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim of 1,000 feet in length, and if the party consists of two, 1,500 feet altogether, on the output of which no royalty shall be charged, the rest of the party ordinary claims only.

Entry fee, \$10. Royalty at the rate of two and one-half per cent, on the value of the gold shipped from the Yukon Territory to be paid to the Comptroller.

No free miner shall receive a grant of more than one mining claim on each separate river, creek or gulch, but the same miner may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notice and paying fee of \$2. A claim may be abandoned, and another obtained on the same creek, gulch or river by giving notice and paying a fee. Work must be done on a claim each year to the value of at least \$200.

A certificate that work has been done must be obtained each year; if not, the claim shall be deemed abandoned and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made, and publishing notice in the Yukon Official Gazette.

**Hydraulic Mining, Yukon Territory.**—Locations suitable for hydraulic mining, having a frontage of from one to five miles, and a depth of one mile or more, may be leased for twenty years, provided the ground has been prospected by the applicant or his agent, is found to be unsuitable for placer mining, and does not include within its boundaries any mining claims already granted. A rental of \$150 for each mile of frontage and royalty at the rate of two and one-half per cent of the value of the gold shipped from the Territory are charged. Operations must be commenced within one year from the date of the lease, and at least \$5,000 must be expended annually. The lease includes all base metals, quartz and coal, and provides for the withdrawal of unoccupied land for agricultural and building purposes.

**Petroleum.**—All unappropriated Dominion lands in Manitoba, the Northwest Territories and within the Yukon Territory, are open to prospecting for petroleum, and the Minister may reserve for an individual or company having anchorage on the land to be prospected, an area of 640 acres, should the prospectors discover oil in paying quantities, and satisfactorily establish such discovery as an area not exceeding 640 acres, including the oil well and such other land as may be determined, will be sold to the discoverer at the rate of \$1.00 an acre, subject to royalty at such rate as may be specified by order-in-council.

I TAKE extreme care of every leaf of tobacco that I buy. Ordinarily a "hand" of tobacco is soaked in water when it is received—I simply moisten the leaves in such a way as to only slightly dampen every part of every leaf. By this means the strength of the tobacco is not impaired—its smoking quality—fragrance and pungent deliciousness, is conserved to the smoker intact.

## EDMONTON ATTACKED.

Continued from page 6.

Edmonton has a population of 18,000, and Calgary 18,311. Make the circle 10 miles radius, and Edmonton has but 20,981, while Calgary has 41,617.

If the Herald "finds" anything approaching this it has another search coming. The one hundred mile circle about Edmonton includes 10 townships in which there is not an acre of homestead land available and an equal number of townships in which considerably over half the homestead land is taken. In 200 of these townships the C.P.R. land is sold. These farms are not only taken up or purchased, they are occupied. Supposing that on each of these quarter sections only one person resides the rural population alone with the rural population alone with in 100 miles of Edmonton is 43,200. But the average family in the west comprises three and possibly four members. This makes the total rural population within the prescribed area between 129,600 and 172,800, say 151,000. The figures of the Herald probably indicate something near the urban population. Add these and the total is 168,000 souls. The Herald's calculation for the larger circles are about equally accurate.

In point of railway importance, there are more than 900 miles of roads in the south, and about 200 in the north, and even with the projected lines completed in the north five years hence, there will still be more miles of railway in the south. The Kneehill road and the Great Northern extensions will increase the southern mileage as much as the G.T.P. will increase that of the north country.

The construction of the C.N.R. and G.T.P. will of necessity involve the addition of 1,000 miles of main line to the railway mileage of Northern Alberta, without taking into account the branch lines necessary to thoroughly cover the thickly settled farming district.

Since the last census there have been 64,000 homesteads taken up in the southern part of Alberta to 9,000 in the north. These figures show the relative importance of the south and north country.

Admitting for the sake of argument what does not exist in fact that this imaginary condition of affairs has existed, it would simply demonstrate that Southern Alberta had more unoccupied land available for settlement than Northern Alberta not that one portion of the province was of more importance or more favored than another. And it can scarcely be construed by the Herald as a compliment that with 900 miles of railway traversing the south country for half a decade there still remained 64,000 unoccupied homesteads.

These random selections from the Herald may serve to sufficiently illustrate the campaign of deliberate and systematic misrepresentation which is being waged against this city.

The Canadian Northwest  
Homestead Regulations

Any even numbered section of Dominion Lands in Manitoba or the Northwest Territories, excepting a sec. 23, which has not been homesteaded, or reserved to provide wood lots for settlers, or for other purposes, may be homesteaded upon by any person who is the sole head of a family, or any male over 18 years of age to the extent of one quarter section, of 160 acres, more or less.

ENTRY.—Entry may be made per the district in which the land to be taken is situated, or, if the homesteader desires, he may, on application to the Minister of the Interior, Ottawa, the Commissioner of Immigration, Winnipeg, or the local agent for the district in which the land is situated, receive authority for some one to make entry for him. A fee of \$10.00 is charged for a homestead entry.

HOMESTEAD DUTIES.—A settler who has been granted an entry for a homestead is required by the provisions of the Dominion Lands Act and the amendments thereto, to perform the conditions connected therewith, under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

(2) If the father (or mother, if the father is deceased) of any person who is eligible to make a homestead entry under the provisions of this Act, reside upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of this Act as to residence prior to obtaining patent, may be satisfied by such person residing with the father or mother.

(3) If a settler has obtained a patent for his homestead, or a certificate for the issue of such patent,

countered in the manner prescribed by this Act, and has obtained entry for a second homestead, the requirements of this Act as to residence prior to obtaining patent may be satisfied by residence upon the first homestead, if the second homestead is in the vicinity of the first homestead.

(4) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of this Act as to residence may be satisfied by residence upon said land.

The term "vicinity" used above is meant to indicate the same township or an adjoining or cornering township.

A settler who avails himself of the provisions of Classes 2, 3, or 4, must subdivide 20 head of stock, with buildings for their accommodation, cultivate 20 acres of his homestead, and have besides 80 acres subtenanted.

The privilege of a second entry is restricted to those settlers only who completed the duties upon their first homesteads to entitle them to patent on or before the 2nd June, 1889.

Every homesteader who fails to comply with the requirements of the homestead law is liable to have his entry cancelled, and the land may be again thrown open for entry.

Application for patent should be made at the end of three years, before the local agent, sub-agent, or Homestead Inspector. Before making application for patent the settler must give six months' notice in writing to the Commissioner of Dominion Lands, at Ottawa, of his intention to do so.

Information.—Newly arrived immigrants will receive at the Immigration Office, in Winnipeg, or at any Dominion Lands Office, in Manitoba or the Northwest Territories, information as to the lands that are open for entry, and from the officers in charge, free of expense, advice and assistance in securing land to suit them. Full information respecting the land, timber, coal and mineral laws, as well as respecting Dominion Lands in the Railway Belt in British Columbia, may be obtained upon application to the Secretary of the Department of the Interior, Ottawa, the Commissioner of Immigration, Winnipeg, Manitoba, or to any of the Dominion Lands Agents in Manitoba or the Northwest Territories.

W. W. COOT, Deputy Minister of the Interior. N.B.—In addition to Free Grant Lands to which the regulations above stated refer, thousands of acres of most desirable lands are available for lease or purchase from railroad and other corporations and private firms in Western Canada.

## Revillon Brothers

LIMITED

## Buy Your Flour Now!

This is the advice we give to our numerous customers and to the public in general

## Buy Your Flour Before It Gets Higher!

We are selling Flour too cheap at present! Still, our loss is your gain. And remember, it is bound to go up.

## Stop and Consider!

Wheat has reached the \$1.06 mark in Winnipeg, \$1.19 1-2 in Minneapolis, and American millers are buying all the Canadian western wheat they can get hold of for milling purposes. The farmers of the Northern States have their eyes turned on this side of border to get their seed wheat. The last item alone means about five millions of bushels. All this will, certainly influence the price of wheat, consequently the price of bread stuff.

## Do Not Hesitate - - Do not Delay

Come and buy your flour from us, we have

Seven

## Prices are Low—Terms are Cash

Our general stock of groceries is complete in all lines and all fresh goods. We invite the lovers of a good cup of tea to try our new lines of Ceylon. Just arrived from the Ceylon Gardens. No need to praise their qualities. They show it in the cup. Remember our motto:—"Small margins. Big turn over."

## Revillon Brothers, Limited

## We Paid \$100,000

For Liquezone, Yet We Give You a 50c. Bottle Free.

We paid \$100,000 for the American rights to Liquezone; the highest price ever paid for similar rights on any scientific discovery. We did this after testing the product for two years, through physicians and hospitals, in this country and others. We cured all kinds of germ diseases with it—thousands of the most difficult cases obtainable. We proved that in germ troubles it always accomplishes what medicine cannot do. Now we ask you to try it—try it at our expense. Test it as we did; see what it does. Then you will use it always, as we do, and as millions of others do. You will use it, not only to get well, but to keep well. And it will save nearly all of your sickness.

## Kills Inside Germs.

Liquezone is not made by compounding drugs, nor is there alcohol in it. Its virtues are derived solely from gas—largely oxygen gas—by a process requiring luminescent apparatus and 14 days' time. This process has, for more than 20 years, been the constant subject of scientific and chemical research.

The result is a liquid that does what oxygen does. It is a nerve food and blood food—the most helpful thing in the world to you. Its effects are exhilarating, vitalizing, purifying. Yet it is a germicide so certain that we publish on every bottle an offer of \$1,000 for a disease germ that it cannot kill. The reason is that germs are vegetables; and Liquezone—like an excess of oxygen—is deadly to vegetable matter.

There lies the great value of Liquezone. It is the only way known to kill germs in the body without killing the tissues, too. Any drug that kills germs is a poison, and it cannot be taken internally. Medicine is almost helpless in any germ disease. It is this fact that gives Liquezone its worth to humanity. And that worth is so great that we have spent over one million dollars to supply the first bottle free to each sick one we learned of.

## Germ Diseases.

These are the known germ diseases. All that medicine can do for these troubles is to help Nature overcome the germs, and such results are indirect and uncertain. Liquezone attacks the germs, wherever they are. And when the germs which cause a disease are destroyed, the disease must end, and forever. That is inevitable.

Any Fever—Influenza  
Lung Disease  
La Grippe  
Croup  
Whooping Cough  
Scarlet Fever  
Typhoid  
Typhus  
Malaria—Neuritis  
Early Heart Trouble  
Pain—Furunculosis  
Pleurisy—Quincy  
Lumbago  
Gonorrhea—Syphilis  
Skin Diseases  
Stomach Troubles  
Blood Troubles  
Constipation

Fever—Gall Stones  
Gout—Gravel  
Gonorrhea—Gleets  
Venereal Diseases  
Tuberculosis  
Yeast  
All diseases that begin with fever—all fevers make—kill all bacteria—all germs—kill all the results of impure or poisoned blood. In numerous deadly Liquezone acts as a violent, accomplishing what no drugs can do.

## 50c. Bottle Free.

If you need Liquezone, and have never tried it, please send us this coupon. We will then mail you an order on a local druggist for a full-size bottle, and we will pay the druggist ourselves for it. This is our free gift, made to convince you; to show you what Liquezone is, and what it can do. In justice to yourself, please, accept it to-day, for it places you under no obligation whatever.

Liquezone costs 50c. and \$1.

## CUT OUT THIS COUPON

For this offer may not appear again, fill out the blanks and mail it to The Liquezone Company, 127-94 Wabash Ave., Chicago.

My disease is—  
I have never tried Liquezone, but if you will supply me a 50c. bottle free I will take it.

Give full address—write plainly.

Any physician or hospital not using Liquezone will be gladly supplied for a fee.

## CITY GOVERNMENT:—

Mayor, K. W. MacKenzie; Aldermen, C. May, K. A. McLeod, W. H. Clark, D. R. Fraser, J. R. Boyle, T. Bellamy, J. H. Picard, W. A. Griesbach.

Conveniences:—Waterworks, sewer systems, telephone system, electric lighting system, all owned and operated by the city.

Board of Trade:—President, J. H. Morris, Secretary, F. F. Tims.

Immigration Officer:—C. W. Sutter.

Educational Institutions:—Public and separate schools, high school, Alberta College.

CHURCHES:—Roman Catholic, Anglican, Presbyterian, Methodist, Baptist, German-Baptist, Lutheran, Salvation Army.

TRAIN SERVICE:—Leaves for Strathcona 7.45 and 15.30. Arrives from Strathcona 9.15 and 11.50.

## LOCAL

—Train on time.  
—Fair and very mild.  
—Frank M. Davis is establishing a retail lumber yard on the syndicate property corner Jasper and Fourth street east. Mr. Davis is an experienced lumberman. Arrangements are being made to erect an office and warehouses at once.

—Mr. C. C. McPherson C. P. R. messenger agent, Winnipeg, came in last evening and went away this morning. His coming was not generally known and no farewell reception tendered him. The purpose of his visit is unknown.

—Calgary Herald:—Rev. Father Leconte left for Ottawa last night having charge of Father Oulevior, of St. Albert, who has suddenly been taken seriously ill. It will be a very trying journey to the venerable missionary, who will have to attend to the nursing of his afflicted brother missionary. Father Leconte will return as soon as he has placed his charge in an institution and transacted some business.

## PERSONAL

Miss Mahaffey late of the teaching staff of the public schools left this morning for Calgary.

Mrs. R. M. Armstrong who spent the past three months in Toronto returned home to-day.

W. Ramsay principal of the city public schools leaves this week for Ontario on a short trip. Mr. Hutton will supply in his absence.

## THE OPERA.

A full house greeted the first appearance of the Edmonton Operatic Society in the operas "Cox and Box" and "Trial by Jury" given last evening in Robertson's Hall. The opinion of all seems to be one of commendation for so successfully presenting those two of the best of Arthur Sullivan's many pieces. In "Cox and Box" there is considerable dialogue, which keeps the listener in line with the ideas offered by the plot, and any who hear the melodies, so as to render it will undoubtedly say that it is fine.

The play narrates the adventures or rather the troubles of two roomers, who unwittingly were occupying the same room, one being out in the daytime and the other at night, but through the manipulations of their landlord, never had met. They confront each other in the room, each claiming to be the possessor. Many amusing incidents occur and in their verbal battle are several very pretty jokes and puns. The landlord comes in and the laughable bits come fast and thick. The play ends with a trio song of splendid harmony.

The scene of the "Trial by Jury" is a court room. A breach of promise case is being tried before a judge and jury, who are strongly attracted by the claims of the lovely plaintiff, and all join in denouncing the defendant.

The piece finally closes by the judge coming down from the bench and declaring his intention of marrying the young lady himself. The juryman, attorneys, bridesmaids and all taking part carried their respective parts very well last evening, and certainly delighted the audience with the charming music which they rendered so well.

The plays will be repeated tonight and tomorrow night.
